

SORAA: AI Graphics & Illustration Brief

Designer handoff – based on the assets currently used in the storefront code. The UI structure, crop areas and placement should remain unchanged; only the artwork may be refreshed.

What this document covers

Local banners, campaign images, illustrations and photo-composites in /public. Shopify product, collection and blog images are live CMS content, so they are listed as ongoing photography requirements rather than fixed local files.

Decision key

Confirmed AI-origin: a matching image-generation prompt file is present. Likely AI / campaign composite: no prompt file beside it, but its visual role and file family indicate generated campaign artwork. Not AI artwork to recreate: retailer logos, SVG icons, logo, and product media from Shopify.

Status	Count	Scope
Confirmed AI-origin	7 source families / 18+ files	Hero artwork, Why SORAA variants, lifestyle contact sheet, category sprite concept, Snack Squad concept
Likely AI / campaign composites	20+ local files	Hero colour variants, category tile imagery, product campaign cards, PDP/editorial background shots
Do not recreate as AI	Retailer logos + UI SVGs	Use official supplied logo files and existing vector UI details
CMS photography needed	All product / collection / blog screens	Provide product packshots and lifestyle images through Shopify

Global creative rules

Keep the SORAA palette: warm cream #FFF9EE, brand orange #FE5100, deep brown #32180F, peach #FFE0C8, plus product-pack colours. Premium but playful, young Indian snack brand, clean studio / editorial lighting, generous negative space, real packaging only. Never add a fake CTA, navigation, watermark, new logo or unapproved copy into a supplied image.

1. Homepage – Hero carousel

Exactly 4 slides currently rotate every 5 seconds. Desktop stage is 480–760 px tall; on mobile each photographic slide uses a 200–320 px image block plus live HTML copy below. Keep the image safe areas clear, especially the left copy zone on slides 2–4.

Asset / current file	Used on screen	Designer brief / replacement requirement
Confirmed AI soraa-website-banner.png 8192 x 3641, 2.25:1	Homepage hero, slide 1	Master campaign banner. Cream base; orange playful headline and handwritten captions on left; five product packs, stone slab and loose nuts on right. Preserve all existing embedded text/design as-is. Empty lower-left area is intentionally reserved for an HTML Shop Now button.
Likely AI hero-snack-range.jpg / .png 2066 x 761, 2.71:1	Homepage slide 2; About hero	Warm orange snack-range campaign. Product group must sit right / centre-right. Keep left 42% visually calm for live headline, description and two CTAs. Produce one master, 2x web export and a mobile crop with product detail still visible.
Likely AI hero-snack-peach.jpg / .png 2066 x 761, 2.71:1	Homepage slide 3	Peach campaign variation with colourful SORAA packs. No text inside image. Keep left 42% quiet and high-contrast for white HTML copy; packs on right.
Likely AI hero-snack-berry.jpg / .png 2066 x 761, 2.71:1	Homepage slide 4	Berry/red campaign variation. No text inside image. Same safe area and pack treatment as slide 3; ensure white typography remains readable.
Reference / legacy hero-reference.png, hero.png, hero-wide.png	Not currently rendered	Keep as reference/source only. Do not deliver as live files unless the developer explicitly swaps the hero implementation.

Delivery for all hero images: final master in PSD/AI/Figma + flattened WebP/JPG. No text baked in except slide 1 where the original creative already contains approved lettering. Keep every pack fully inside a 16:9 mobile crop.

2. Homepage – Categories, social and lifestyle

These areas are image-led but the surrounding labels, arrows, captions and section headings are HTML. The graphic designer should supply visual-only artwork.

Asset / current file	Used on screen	Designer brief / replacement requirement
Likely AI categories/category-01.jpg to category-07.jpg 7 x 5001 x 5001	Homepage Shop by Category	Seven square top-down food photographs: (1) nuts & raisins, (2) seeds & superfoods, (3) trail mix, (4) flavoured nuts & mixes, (5) spices & masalas, (6) bundles & giftpacks, (7) dry fruits. Same warm light, cream / neutral base, central product arrangement. No title or arrow within the image. Supply 1:1 images, 2400 px minimum; website labels sit below each card.
Confirmed AI concept category-artwork.png 2172 x 724, 3:1	Legacy / CSS sprite; visual reference	Seven evenly-spaced overhead food arrangements on warm cream #FFF9EE, one horizontal row, no text/labels. It is not the current category-card source, but retains the desired visual language.
Confirmed AI snack-squad.png wide 3:1 contact sheet	Homepage Real People, Real Snacking	Five equal vertical lifestyle panels edge-to-edge: Sikh man at home; woman at work desk; man outdoors; woman after yoga; man relaxing. Indian adults, candid waist-up, food/hands visible, warm editorial light. No pack shots, logos, text, gutters or fake play icons.
Confirmed AI lifestyle-scenes.png 2172 x 724, 3:1	Homepage lifestyle cards; About SORAA	Four equal scenes in one horizontal sheet: desk/laptop, gym bag, train travel, book/tea. Warm cream/orange/green palette, no faces/logos/type. Current site crops it into four 4:5 cards, so each quarter must have its subject centred with breathing room.

3. Homepage – product campaign art

These five portrait compositions are reused across the homepage, welcome offer, reviews, collection/product banners and overlays. They are the most important reusable illustration family after the hero.

Asset / current file	Used on screen	Designer brief / replacement requirement
Likely AI / campaign composite feel-good/breakfast-mixes.png 1121 x 1403, 4:5	Better For You, reviews, explore, product overlays	Morning Energy Breakfast Mix. Vertical premium snack moment; pack must be readable and remain the main focal point. Safe central crop; no embedded CTA.
Likely AI / campaign composite feel-good/dates-date-bites.png 1121 x 1403, 4:5	Better For You, reviews, product overlays	Date Bites campaign card. Pack plus complementary ingredients. Same lighting, scale and visual density as the full set.
Likely AI / campaign composite feel-good/dry-fruits.png 1121 x 1403, 4:5	Better For You; PDP banner back pack	Premium Walnut Kernels. Keep product pack centred and legible; transparent-ish / isolated composition works best because it layers in the PDP banner.
Likely AI / campaign composite feel-good/flavored-nuts.png 1121 x 1403, 4:5	Better For You; Welcome Offer; PDP banner front pack	Peri-Peri Roasted Cashews. Same master family; designed to overlap another pack without a hard rectangular background.
Likely AI / campaign composite feel-good/best-sellers.png 1121 x 1403, 4:5	Homepage reviews / explore	Best-sellers / Date Bites snack moment. Portrait product editorial. Keep the pack and food crop-safe at 4:5.

Designer delivery: five consistent 4:5 masters at 2240 x 2806 px (or larger), with layered source. Avoid small lettering, thin edge details or objects touching frame edges; the site scales and overlaps these files.

4. Homepage – Why SORAA campaign family

The live homepage uses the orange version. The cream and sky versions are retained in the asset folder and show the approved alternate treatments.

Asset / current file	Used on screen	Designer brief / replacement requirement
Confirmed AI why-soraa-orange.png 1774 x 887, 2:1	Homepage Why SORAA	LIVE. Five upright SORAA packs: purple Date Bites, orange Walnut Kernels, green Super Seed Mix, magenta Cranberries, green Pistachios. Rich orange clouds (#FF681F / #FF8B40), ivory space at top, pale cream sandstone podium, scattered nuts. Preserve pack identities and composition. No new copy.
Confirmed AI why-soraa-cream.png 1774 x 887, 2:1	Unused alternate	Same pack composition on warm ivory #FFF9EE, pale peach clouds and cream sandstone. Useful for a light-theme campaign or email.
Confirmed AI why-soraa-sky.png 1774 x 887, 2:1	Unused alternate	Same pack composition on bright sky blue, wispy clouds and pale-blue podium. Useful alternate only; no headline/buttons in artwork.
Likely AI hero-snack-better.jpg 1600 x 844, 1.9:1	Product detail editorial/review fallback	Date Bites snack-break lifestyle. Natural product editorial; keep usable space for overlay / text treatments.
Likely AI hero-grab-snack.jpg 1600 x 844, 1.9:1	Product Extras close / CTA	Grab-and-go pack scene; product packs visually clear, modern lifestyle feel, no text baked in.

5. Screen-by-screen graphics checklist

This is the production checklist for the graphic designer. Counts indicate artwork groups, not repeated responsive exports.

Screen	Graphic requirement	Qty	Notes
Homepage	4 hero slide masters + 7 category images + 1 Snack Squad contact sheet + 1 lifestyle contact sheet + 5 Feel Good portraits + 1 Why SORAA master	19 artwork groups	Most visual screen. Keep all composition safe areas detailed in this PDF.
About SORAA	Hero range asset + lifestyle contact sheet	Reuses 2	No additional illustration required.
Product detail page	2 portrait campaign layers + 2 editorial wides	Reuses 4	The actual product gallery is Shopify CMS, not a local AI asset.
Cart / cart drawer	No external illustration	0	Nut ornaments are code-drawn SVG. Do not replace with raster art.
Collections, search, wishlist	No fixed local graphics	0	Product cards use Shopify product images.
Journal / blog	No fixed local graphics	0	Article imagery comes from Shopify CMS.
Investor, policy, contact	No fixed local illustrations	0	Graphic UI is CSS typography / colour blocks.
Header / footer	Brand logo + retailer logos + SVG icons	0 AI assets	Use official supplier files; do not generate logos or trademarks.

CMS photography requirement

For every sellable product: minimum 4 images – 1 clean front packshot, 1 angled packshot, 1 ingredient/detail shot, 1 lifestyle / in-use shot. Recommended: 6-8 images with pack-size / flavour variants. For each collection: 1 cover image (landscape 3:2 or square). For each blog article: 1 landscape cover image (minimum 1600 x 900). These are uploaded in Shopify; no local file path is defined.

6. Handoff specifications

Give the developer a final export folder which follows the existing file names, plus editable sources. The code already points to these paths, so replacement is safest when dimensions / aspect ratios do not change.

File format	WebP preferred for final photographic/composite exports; JPG is acceptable. PNG only where transparent background is truly required. Keep editable PSD/AI/Figma source files separately.
Resolution	Export at least 2x the intended web display: hero 4128 x 1522 minimum; Why SORAA 3548 x 1774; portrait campaign art 2240 x 2806; category tiles 2400 x 2400. Do not upscale low-resolution AI output.
Colour / print	Use sRGB for web exports. If printing is needed, create separate CMYK artwork – do not overwrite web files.
Packaging	Use approved SORAA pack designs exactly. Labels must remain legible, accurate and free from hallucinated claims, ingredients or logos.
Accessibility	All text that is required for meaning / action should remain HTML. If an image contains approved decorative lettering, never rely on it alone for important information.
QA before handoff	Check desktop 1440 px and mobile 390 px crops. Verify no heads, packs or key ingredients are cut off; verify text space remains uncluttered; verify no watermarks, extra fingers, distorted packs or invented brand marks.

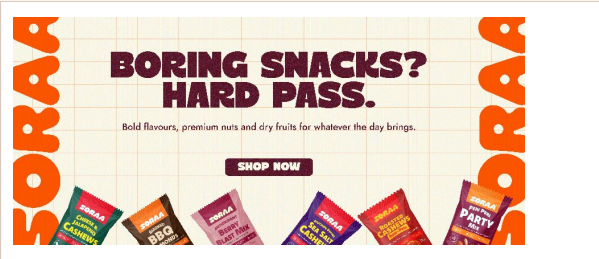

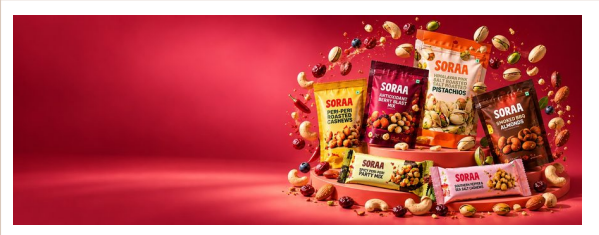

Recommended delivery structure

/hero/ soraa-website-banner, hero-snack-range, hero-snack-peach, hero-snack-berry
/categories/ category-01 through category-07
/campaign/ five feel-good portraits, lifestyle-scenes, snack-squad, why-soraa-orange / cream / sky
/pdp/ hero-snack-better, hero-grab-snack
/source/ editable originals and a short readme naming all exports

Important: this document identifies image-generation provenance from the repository evidence. It does not claim that every unprompted local image was generated by AI; those assets are labelled “likely” so the designer can confirm ownership / source before recreating them.

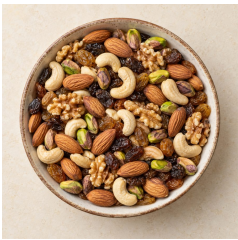

Visual appendix A – Hero banners

Current live / campaign hero assets. The first image has approved embedded campaign typography; the other three are used with live HTML copy over the left side.

	Hero 01 – embedded campaign artwork public/soraa-website-banner.png
	Hero 02 – orange range public/hero-snack-range.jpg
	Hero 03 – peach range public/hero-snack-peach.jpg
	Hero 04 – berry range public/hero-snack-berry.jpg

Visual appendix B – Category imagery

Seven current homepage category card images. HTML labels appear below these images in the UI and are not part of the artwork.

	01 – Nuts & Raisins public/categories/category-01.jpg		02 – Seeds & Superfoods public/categories/category-02.jpg
	03 – Trail Mixes public/categories/category-03.jpg		04 – Flavoured Nuts & Mixes public/categories/category-04.jpg
	05 – Spices & Masalas public/categories/category-05.jpg		06 – Bundles & Giftpacks public/categories/category-06.jpg
	07 – Dry Fruits public/categories/category-07.jpg		

Visual appendix C – Portrait campaign art

Reusable 4:5 compositions used in the Better For You section, reviews, overlays, welcome offer and product-page promotional banner.

	Breakfast Mixes public/feel-good/breakfast-mixes.png		Date Bites public/feel-good/dates-date-bites.png
	Dry Fruits public/feel-good/dry-fruits.png		Flavoured Nuts public/feel-good/flavored-nuts.png
	Best Sellers public/feel-good/best-sellers.png		

Visual appendix D – Lifestyle and Why SORAA

Approved references for the lifestyle strip and the three Why SORAA colour treatments.

	Lifestyle contact sheet public/lifestyle-scenes.png
	Snack Squad contact sheet public/snack-squad.png
	Why SORAA – live orange public/why-soraa-orange.png
	Why SORAA – cream alternate public/why-soraa-cream.png
	Why SORAA – sky alternate public/why-soraa-sky.png
